PROFESSIONAL EXPERIENCE

Programmer Analyst Trainee | Cognizant | Jun 2024 – Nov 2024

- Developed, tested, and debugged enterprise application modules, improving software quality and reliability.
- Collaborated with development teams across SDLC phases including analysis, implementation, testing, and deployment.
- Applied OOP principles and database concepts to create maintainable and scalable solutions.
- Resolved logical, syntax, and runtime issues to enhance application stability and performance.

PROJECTS

Stay'N'Joy – Full Stack Accommodation Booking Platform

Tech Stack: React.js, Spring Boot, MySQL, REST APIs, JWT, AWS

- Architected and developed a full-stack accommodation platform supporting 1,000+ concurrent users and thousands of listings.
- Built responsive React.js interfaces and reusable UI components to improve user experience across devices.
- Developed RESTful APIs for property listing, search, booking, authentication, and user management features.
- Implemented Spring Security, JWT Authentication, and Role-Based Access Control (RBAC).
- Designed normalized database schemas and optimized SQL queries for efficient data retrieval.
- Deployed frontend on Vercel and backend infrastructure on AWS EC2 and AWS RDS.

IoT-Based Smart School Bus Monitoring System

- Engineered a GPS-enabled real-time school bus monitoring solution with approximately 90% tracking accuracy.
- Enabled live location tracking and status monitoring to improve operational visibility and student safety.
- Improved system reliability through continuous real-time communication and monitoring.
